#### **Product lines:**

- Easy Panel<sup>™</sup> construction material
- Unique and Innovative LiteCast panel

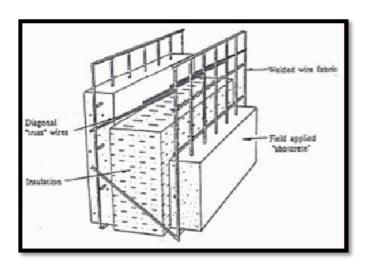

# Easy Panel<sup>TM</sup>

**Efficient and Effective** 

## **Easy Panel**<sup>™</sup>

- Partially prefabricated construction material using sandwich panel technology
- Tested and certified to international construction standards
- Patented technology
- Product information:
  - A panel of 3D high tensile 3mm steel wire
  - Fire resistant expanded polystyrene (EPS) with field-applied concrete
  - Standard size: 3.0 m \* 1.2 m
  - Weight: 16 Kg

### Easy Panel™: Technical Specifications

#### Fire resistance

- EPS Polystyrene core non-flammable and fire resistant
- Tested by Branz Appraisal (similar product)
- 50mm thick Easy Panel<sup>™</sup> achieved up to 90 FRLs (Fire Resistance Levels)

#### Strength & durability

- High tensile steel wire core
  - Construction of houses up to 3 stories without supporting columns and beams
- · Lightweight material
- Tested by the Burapha University, Chonburi, Thailand
  - Vertical load: over 100,000 N
  - Bending strength: over 8,000 N

#### Thermal & acoustic insulation

- Superior ability to retain cold or heat
- Polystyrene core with double layer of concrete reduces outside noise and heat transfer
- Tested by Branz Appraisal (similar product)
- Potentially reach an R-value of 1.2 for a 50mm panel sample

## Advantages

#### 1. Standardisation

- Easier management and planning
- Higher level of building accuracy
- Ease of predicting construction delivery risks

#### 2. Efficiency

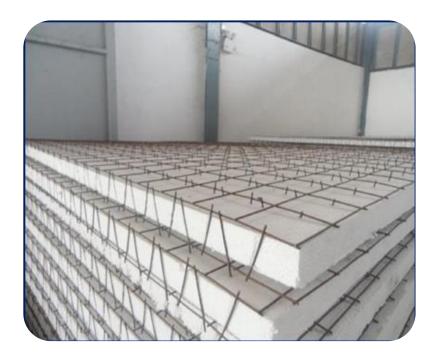

- Factory production is more efficient than standard on-site construction
- Less need for skilled labour
- Less waste of resources

#### 3. Speed

- Time of construction is greatly reduced
- Reduced labour costs
- Quicker return on investment for the builder and/or project developer

#### 4. Green Material

- Thermal insulation
  - Reduces energy consumption
  - cost saving

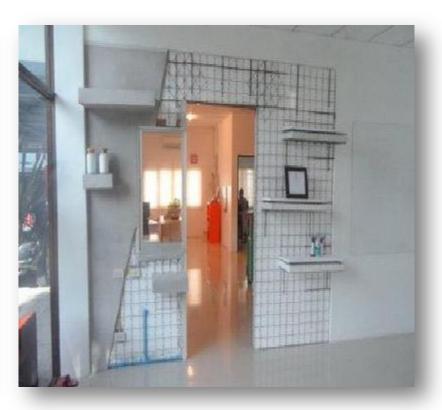

## Easy Panel™: Construction Demo

## Display wall

Utilities installed within the wall prior to rendering

Can make shelving, cupboards, wardrobes, etc., from off-cuts - nothing wasted!

### Easy Panel™: Diverse Applications

#### From Low-cost to Mid-market

- Residential development
- Government housing
  - Be competitive to be able to win tenders
- Town house and terraces
- Small retail shops

**Low-cost Housing** 

**Mid-market Housing** 

### Easy Panel™: Diverse Applications

#### **High End**

- Luxury Housings
- Luxury Condos
  - Acoustic insulation
  - Thermal insulation
- Large Commercial Projects
  - Hotels
  - Office buildings
  - Factories
  - Warehouses
  - Big box retail stores
    - Quickly built
    - Open for business sooner

**Luxury Housing** 

**Large Commercial Projects** 

## As a Developer...

- ✓ Is customer <u>satisfaction</u> important?
- ✓ Is build **quality** important?
- ✓ Is **speed** of construction important?
- ✓ Are improved <u>profit margins</u> important?

#### "Bangkok, the Green City"

Under the initiative, the final draft of which was approved by the Cabinet, the goal is to promote environment-friendly buildings in line with the guidelines of the Thai Green Building Institute by permitting increased floor-area ratios beyond the level allowed for standard buildings.

While this will present a challenge for property developers, who *will need to increase their budgets* if they are going to put up green buildings, the aim is to save energy costs in the long term, said Panyapas Nopphan, deputy directorgeneral of the Bangkok Metropolitan Administration's City Planning Department.

Adopted from The Nation, May 03, 2013

# EASY PANEL™ IS AN ENERGY SAVING GREEN SOLUTION AND COST EFFECTIVE BOTH IN TIME AND MONEY!

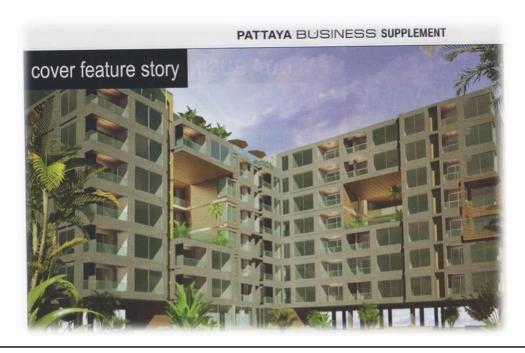

# Case Study 1

The Cube, Pattaya

### Case Study: The CUBE

#### Case Study: The CUBE

With a build quality and the use of new and eco friendly buildings designed to insulate the units and save the owners running costs, something that Tudor Group prides itself on, combined with comfort and luxurious affordability, The Cube will undoubtedly be a success in every aspect.

# Case Study 2

**The Vineyard** 

#### **Luxury Housing**

The award winning, five star luxury residence, **The Vineyard**, uses the Easy Panel™ wall system for their premium *'green option*' which not only reduces living costs but also gives back to the environment.

The Easy Panel™ wall system offers greater thermal efficiency minimizing the cooling load which makes it at least **30% - 50% cheaper** to run as it consumes less power.

**Paradise Residence** 

### Case Study: Paradise Residence

Paradise Residence: <a href="http://www.paradisesamed.com/">http://www.paradisesamed.com/</a>

#### Case Study: Paradise Residence

The building will be in an L-shape just four floors high and a wall construction system called Easy Panel™ will be employed. Easy Panel™ is *quick to erect*, the walls will all be straight and the *acoustics will be good* with virtually *no noise* from neighbours. The Easy Panels™ also *keep the cool in and heat out*.

"It's a product of the future that will allow us to erect **500sqm of walls in a day**," said a spokesman for Blue Diamond.

#### What is important for you?

- ✓ Is having a 'Green' eco-friendly end product important?
- ✓ Is customer <u>satisfaction</u> important?
- ✓ Is build <u>quality</u> important?
- ✓ Is **speed** of construction important?
- ✓ Are improved <u>profit margins</u> important?

#### Easy Panel™: Bottom Line

- ✓ Less skilled labour required
- ✓ Fewer workers needed
- ✓ No heavy lifting equipment
- ✓ No beams and columns required
- ✓ Speed of construction
- ✓ Energy efficient technology makes it a premium product

# LiteCast Panel

Unique and Innovative

#### LiteCast Panel

- An innovative and unique building material
- 2. Hybrid Technology
  - Easy Panel<sup>™</sup> sandwich panel & precast concrete panels
  - Same advantages as a precast concrete panel
    - Quick and easy
    - No need to change construction methods
  - Superior thermal and acoustic insulation
- 3. High quality: stronger & lighter
- 4. Similar cost alternative to standard precast concrete panels
